Ideal Standard

When design meets performance

Everything we create at Ideal Standard is built on the fundamental belief that design and performance are inseparable in the quest for truly exceptional bathrooms and washrooms. This philosophy drives us to meticulously craft products that not only attract the eye but also exceed expectations in terms of functionality and reliability.

Our Atelier Collections embody the perfect fusion of these principles. These stunning ranges exude timeless elegance, drawing from Ideal Standard's rich heritage while always looking forward. From the neo-classical styling of Calla to the mid-20th century retro of Tipo-Z to the sophisticated simplicity of Solos, each collection seamlessly blends legacy with modernity to create something truly special.

Moreover, our commitment to excellence extends beyond aesthetics and functionality; sustainability is at the heart of everything we do. Every new range is conceived within a framework that ensures sustainability is considered in everything from raw materials to the operation of the installed product.

Our mission is to enhance the lives of our customers and partners. With a vast array of bathroom solutions across a complete range of product categories, Ideal Standard is your one-stop source for everything you need, whether for homes, hospitality, offices, or any other space. This commitment is encapsulated in our Singular™ philosophy, where products from our entire portfolio work beautifully together in terms of appearance and compatibility. Every aspect, from inspiration to installation, is meticulously considered.

We are incredibly proud of our Atelier Collections, and we hope you find them as inspiring as we do.

Jan Peter Tewes
VP Sales at Ideal Standard International

Crafting timeless elegance

Design is an ever-evolving process, often in ways that are not immediately tangible. However, this doesn't necessitate reinventing your style or identity with every new trend. For me, it means crafting something that seamlessly integrates aesthetics, performance, heritage, and modernity to create timeless products.

Nothing embodies this fusion of influences more than the Atelier Collections by Ideal Standard. This is an exquisite family of product ranges, where elegance meets functionality, and where every curve, every line, is a testament to timeless design.

These bathroom ranges are not merely functional things to own; they are expressive pieces, conceived to elevate our daily rituals into moments of indulgence and enjoyment which help to improve our lives. Ideal Standard's rich history gives me, as a designer, so much to draw upon and to inspire, balancing this appreciation of legacy with a desire to always look forward and push ourselves towards new possibilities.

Behind the seamless aesthetics lies a dedication to performance. This could be in the innovative materials or the advanced technologies; every component is there to ensure a lifetime of superior functionality and durability.

When contemplating the ways in which bathrooms can enhance our daily lives, I think of La Dolce Vita®. In Italy, it signifies an appreciation for life's simple pleasures; the everyday moments. Our range of the same name embodies this sentiment, crafting a tactile, expressive space whose sensuality ignites inspiration and dreams, fostering the birth of new ideas.

In designing the La Dolce Vita® products, it was imperative to encapsulate this essence and infuse it into every facet of the collection. I invite you to delve into our Atelier Collections and experience first-hand how a beautifully crafted bathroom can evoke a new found appreciation for life's smallest joys.

Together for a better future

As a leading bathroom manufacturer, Ideal Standard is committed to building a more sustainable future. We believe that acting responsibly is key to our long-term success and benefits our partners, customers, employees, and the wider communities in which we operate.

This commitment led to the development of EcoLogic, a new approach to product development that focuses on four values, allowing us to integrate sustainability into our manufacturing processes and our finished products.

These four values touch every phase of a product's life-cycle and focus on reducing CO^2 emissions and waste, saving energy, water and other natural resources, promoting hygiene and protecting vulnerable users.

In 2023, our sustainability efforts were recognised with an EcoVadis Silver Medal.

Sustainable Value Chains

Redefining the manufacturing and supply chain to drive renewable and sustainable processes and transportation.

Sustainable and Durable Materials

Reimagining the use of materials, focusing on increasing the use of recycled materials, efficiency, durability and recyclability, and reducing waste.

Water and Energy Efficiency

Optimising and reducing the use of water, especially hot water, and therefore also energy, during the use of our products.

Elevated Hygiene

Promoting health and wellbeing by maximising hygiene and sanitation performance above standards, not only for hospitals and care homes or in public washrooms, but more and more in the residential sector.

DIAMATEC®
CERAMIC MATERIAL

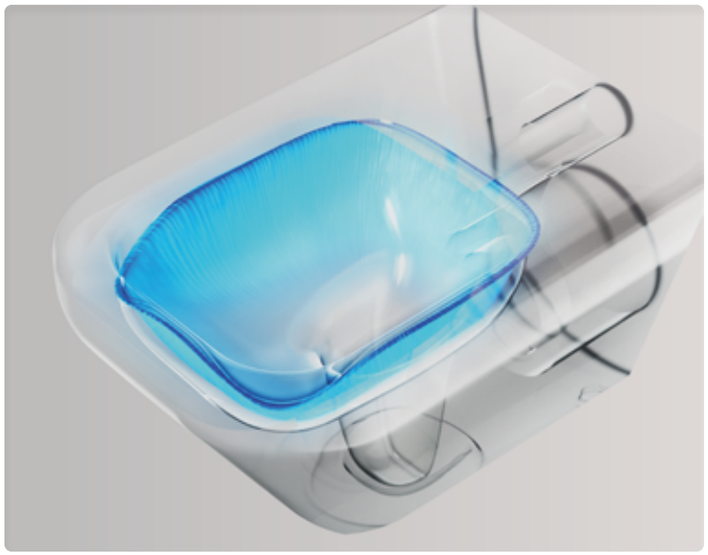
A circular economy involves minimising material usage from the very beginning. Diamatec®, made with a distinctive blend of alumina and chamotte, achieves exceptional strength and durability with less material. To make an equally durable product, we would have to use 25% more fine fire clay material. However, the robust nature of Diamatec® ceramic material means we can craft thinner basins using less material.

Diamatec
technology

AQUABLADE®

Superior, splash-free flushing, even at low water volumes. For spaces where hygiene is paramount, and for washrooms where first impressions are essential, AquaBlade® is the ultimate design solution.

Ensures 95% of the surface is cleaned every time. Proven to be up to 25% quieter than equivalent models. More effective and efficient use of water compared to standard flushes.

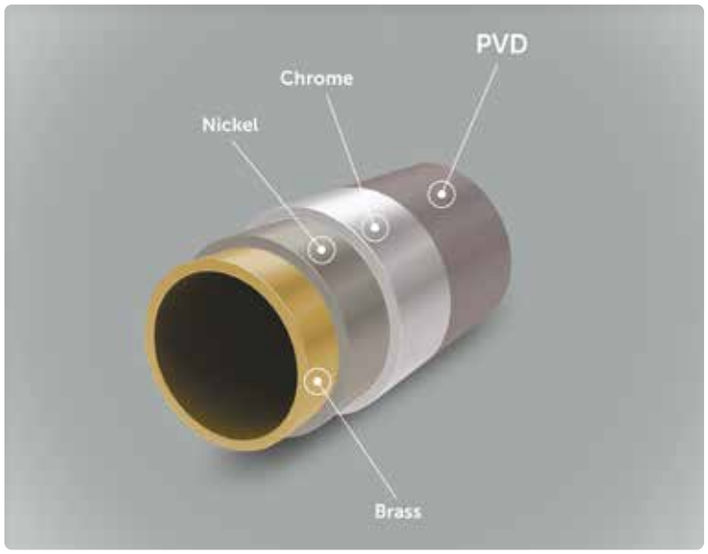


DIAMATEC® BRASS

Diamatec® Brass is our most sustainable brassware. Making up more than 90% of our fittings, it uses less raw materials and creates more durable taps with optimal wall thickness, which is only possible because of the use of a much stronger, Dezincification Resistant (DZR) brass alloy.

PVD COATINGS

Physical Vapour Deposition (PVD) technology allows us to apply fine layers of metal, atom by atom. Used for our coloured fittings, this allows us to control the composition, hardness and durability of the surface compounds, resulting in vibrant shades that are still free from scratches and abrasion marks even after 10,000 uses.



FIRMAFLOW®

We pioneered the ceramic disc cartridge in 1969. This innovation redefined the way people used bathrooms and made it possible to create the single lever tap. Today, FirmaFlow® sets the standard for quality with its innovative engineering and exceptional durability, comfort and control. Designed to deliver smooth operation for over 500,000 use cycles - more than six times the EU norm (EN817).

La Dolce Vita®

The allure of imagination

COLLECTION

Embrace endless possibilities as you step into a space where every moment is infused with joy, where life is a celebration of all its vibrant colours and exquisite pleasures. Immerse yourself in the evocation of a unique art of living, reimagined in a timeless, sensual collection that captures the essence of Italian charm and sophistication.
La Dolce Vita® offers solutions for the entire bathroom, from vanities, toilets, and bathtubs to taps, shower products, and accessories. Standout pieces include asymmetric vanities, a free-standing bathtub, and deep, flower-shaped vessel basins. The collection's beauty is balanced between geometric shapes and forms inspired by the natural environment. Classic tapered design elements and sensual curved edges elegantly separate the products out of the crowd, creating a distinct atmosphere of luxury and refinement.

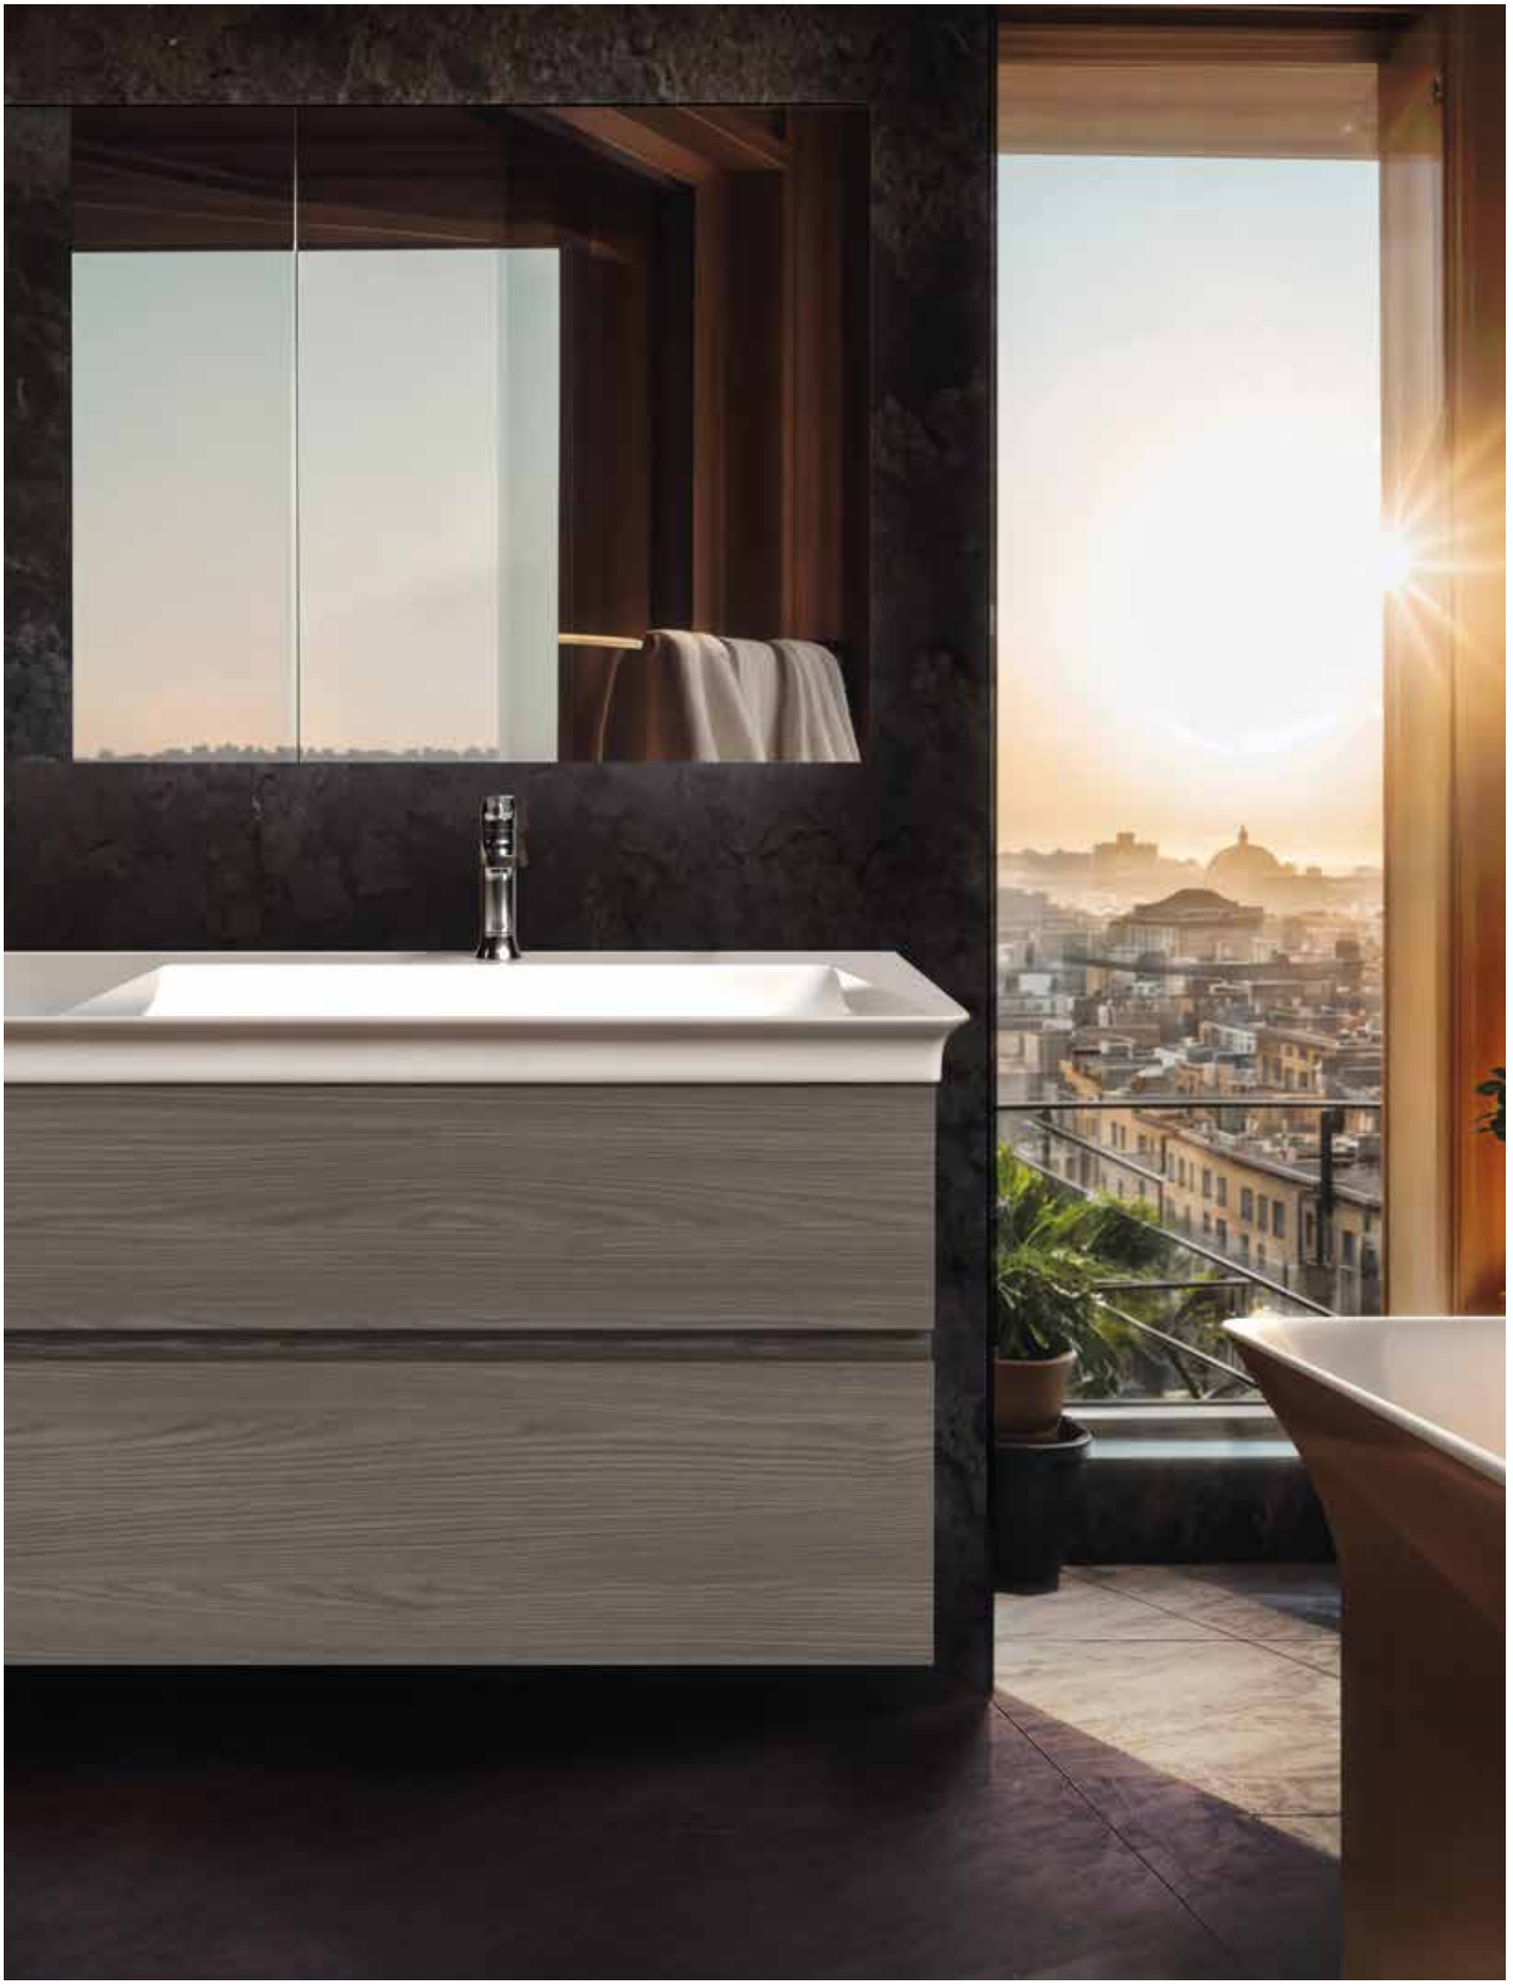
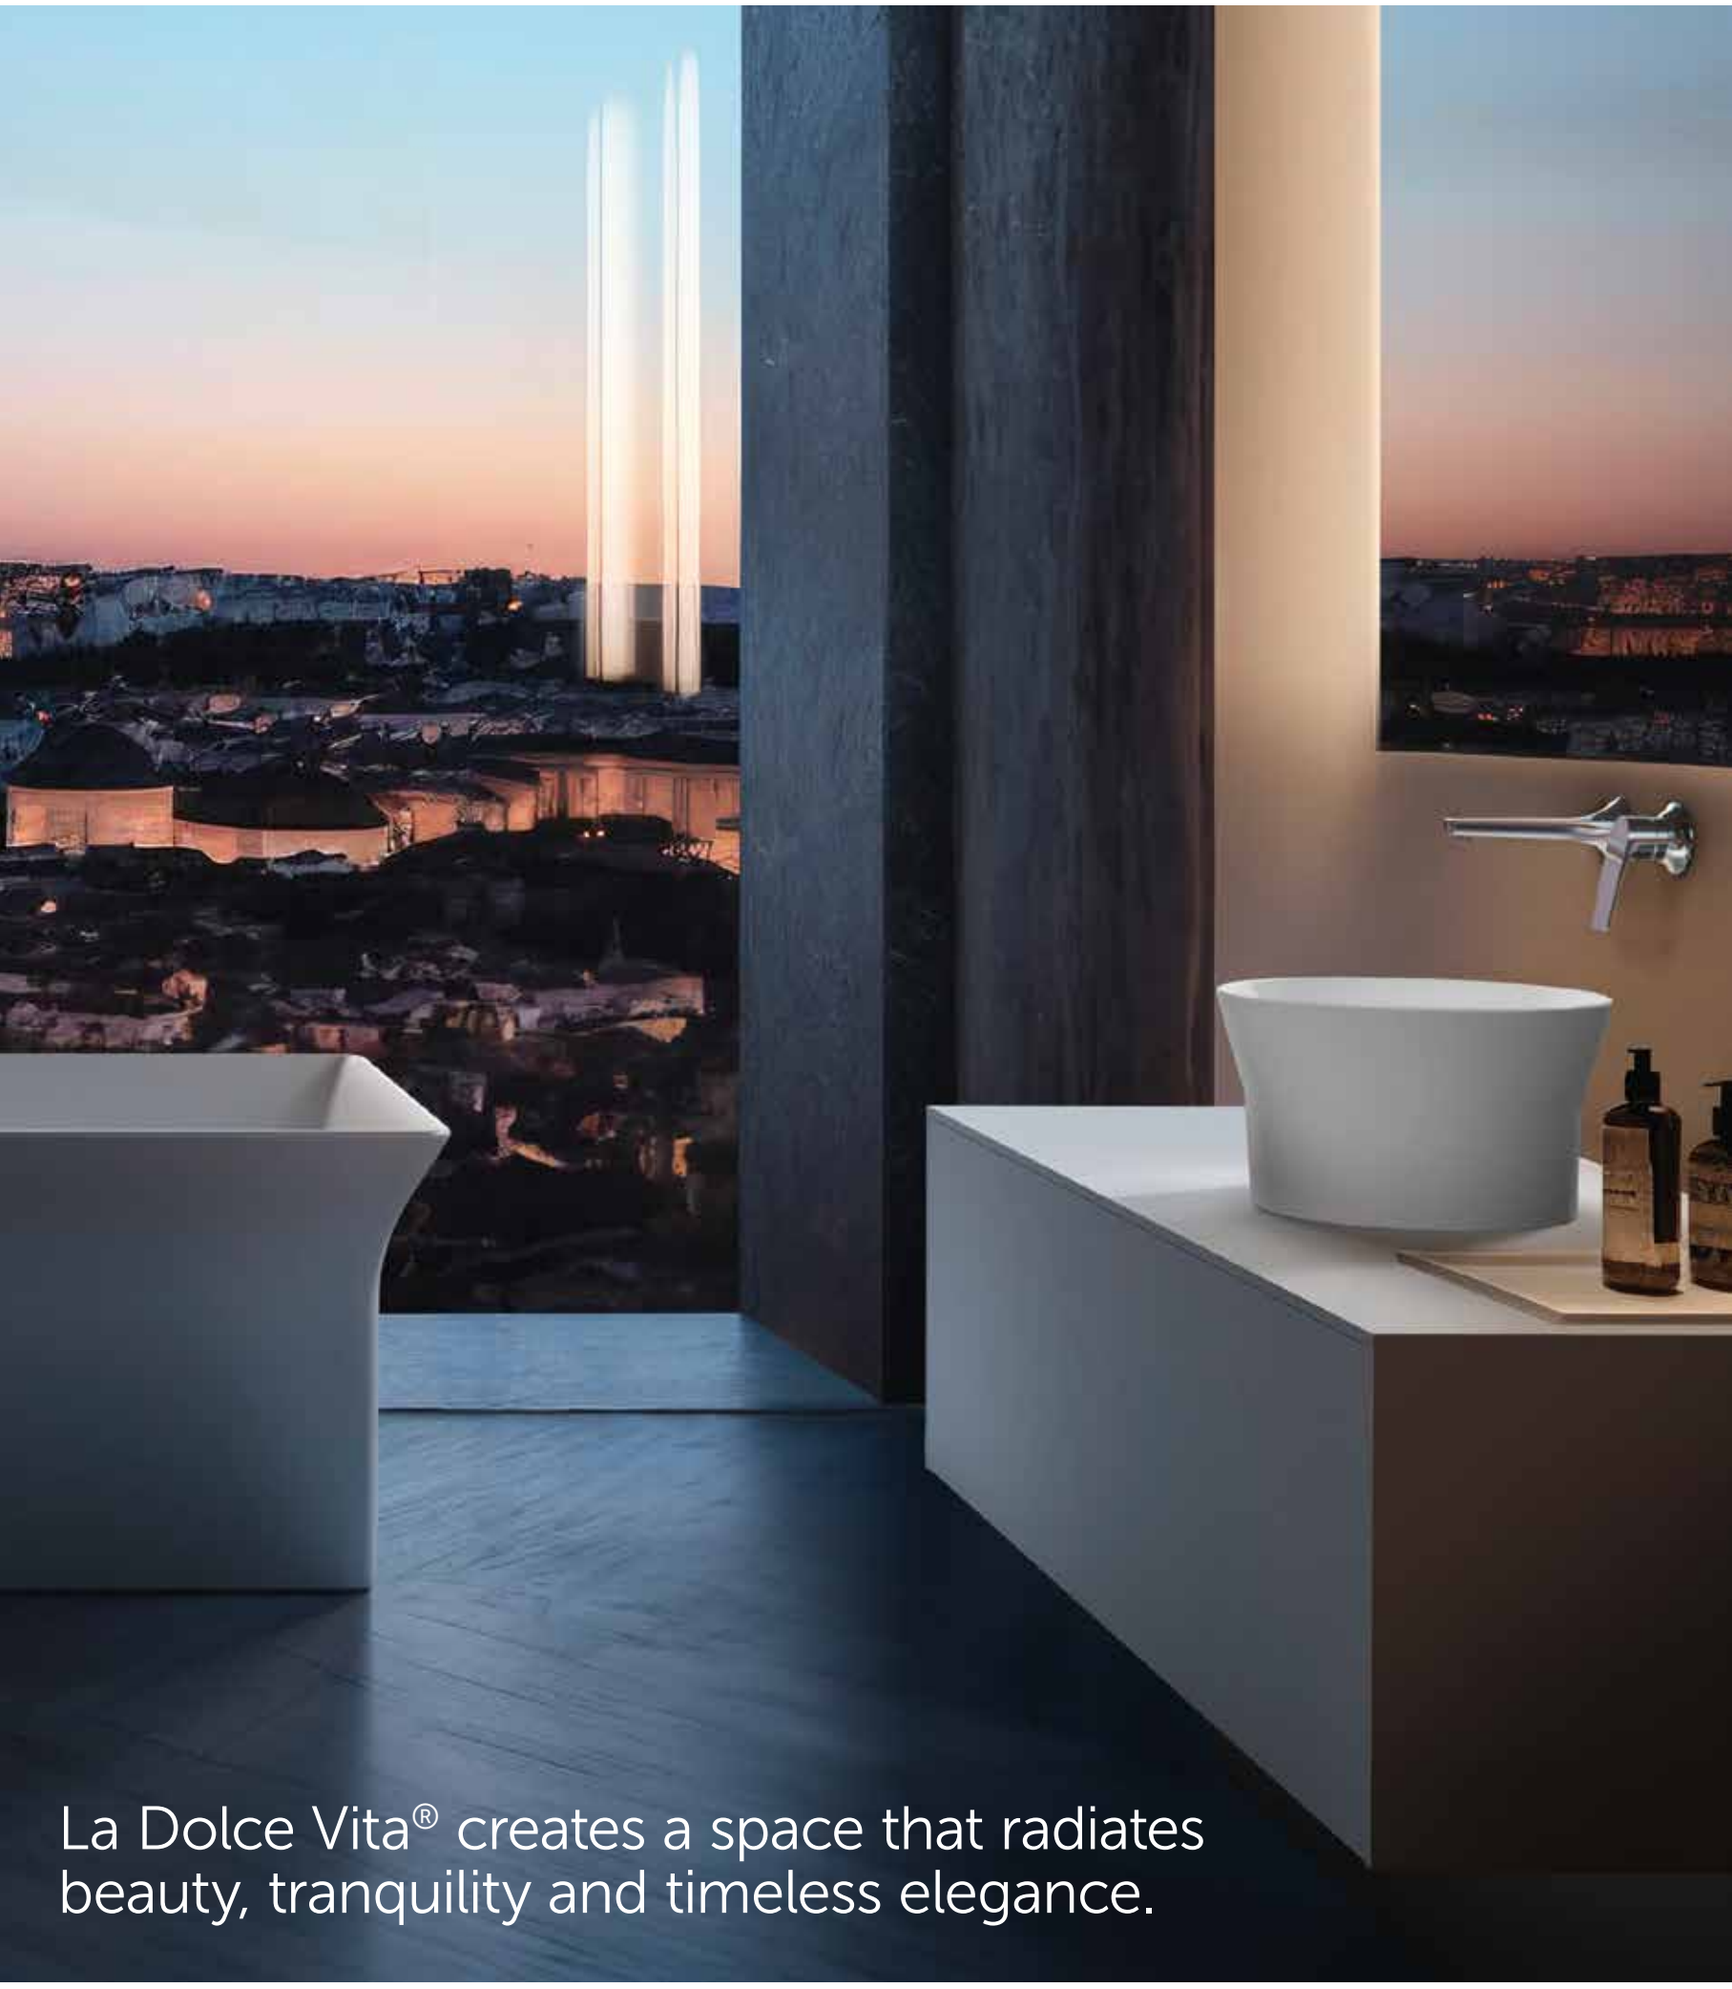
LA DOLCE VITA®
FINESSE

Off-set basin 120cm & basin mixer
Furniture unit / Dark Elm

Experience a symphony of elegance and functionality with La Dolce Vita®, where each piece is crafted with meticulous attention to detail. From sleek mixer taps to exquisite ceramic pieces, every element embodies the spirit of La Dolce Vita® - effortlessly blending style with practicality for a truly indulgent experience.





La Dolce Vita® creates a space that radiates beauty, tranquility and timeless elegance.

SHINI SHAMPOO
SORT OF COAL

La Dolce Vita® embodies beauty in every detail. This collection strikes a harmonious balance between geometric shapes and forms inspired by the natural environment. Classic tapered design elements and sensual curved edges elegantly set these products apart from the crowd.

Wall hung toilets (right)
Back to wall toilets (left)

La Dolce Vita® blends exquisite craftsmanship with practicality, offering a collection that elevates everyday routines with timeless elegance and smart features - a celebration of life's simple pleasures and the epitome of Italian style.
The collection's WCs feature either AquaBlade® technology or RimLS+® on wall-hung bowls for excellent flushing performance and improved hygiene.
The FirmaFlow® ceramic cartridge in our taps ensures durability and PVD technology makes our coloured taps extremely hardwearing. EcoFlow regulators in the taps and shower products reduce water consumption, while toilets are designed to flush efficiently with only 4.5L per full flush, promoting a more sustainable use of water.

Solos

The radical essence of minimalism

COLLECTION

Reflecting the beauty of simplicity, Solos' minimalist yet sensual design evokes a sense of lightness and timeless elegance. The collection's flagship piece, an integrated basin and fitting combination, embodies this minimalist yet sensual aesthetic. With its sleek lines and ultra-thin edges, the basin appears weightless, enhanced by a fully integrated, sophisticated fitting that maintains a seamless look, revealing only the tap and control knob above the ceramic surface. The innovative fitting features sequential mixer technology for precise temperature and flow control, with an optional touchless model providing enhanced convenience.

The Solos shower range combines intuitive controls, a variety of spray modes, and integrated ambient lighting for a luxurious, spa-like experience. The overhead shower features a customisable colour-changing light to create a relaxing atmosphere. With luxurious spray modes, including the innovative SilkRain jet, users can indulge in a sensory shower experience tailored to their preferences.

SOLOS

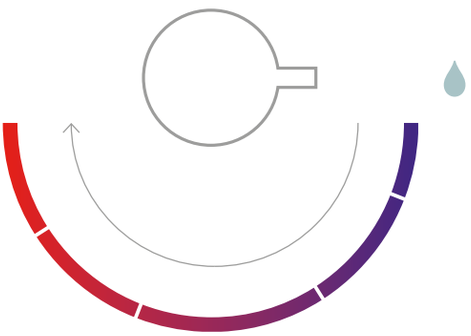
Basin 120cm with shelf
Sequential basin mixer / Chrome

Solos' innovative and visually striking flagship piece is a unique integrated combination of a fitting and basin. The basin's fine, straight lines and extremely thin edges give it a distinctive weightless look, while the sophisticated fitting completes the seamless, pure appearance. Only the graceful spout and control knob are visible, with the supporting technology hidden underneath the basin, making this combination truly unique.

The tap hole has been drilled with such precision that there is no need for an escutcheon ring, which would typically hide any small breakages and ensure stability.

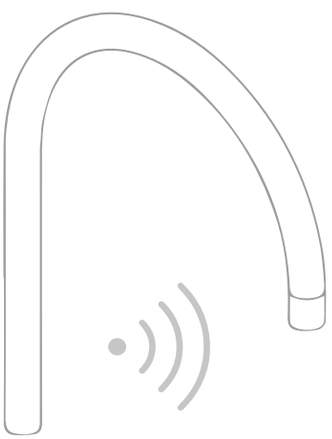
Solos is packed with hidden technology that quietly makes life better. Here's what our sequential valve and capacitive sensor do for you.



SEQUENTIAL VALVE

A sequential valve creates a tap where turning a single handle or lever controls both water flow and temperature. They are simple to operate and are often used in taps for accessible bathrooms and washrooms.

Here's how they work: Turning to the right closes the valve and shuts off the water. Turning progressively to the left first delivers cold water, then warm water and fully to the left hot water. Please note: A special basin with small holes is needed for the Solos tap with the Ø20mm spout and Ø30mm handle.



CAPACITIVE SENSOR

Capacitive sensors are not visible, unlike infrared sensors, offering opportunities for sleeker, more minimalist design.

Here's how it works: One electrode is attached to the spout and another to the wall under the basin. A thermostatic pre-mixer is installed on the angle valve to the wall. The sensor has three levels of sensitivity which can be adjusted after installation with the control button on the sensor box. Touchless detection starts and stops the water. Water starts to flow when the hand approaches the spout from any direction and stays on as long as the hands are within range.

For more flexibility, Solos fittings can also be combined with our Extra-Solos basins.

SOLOS & NAVIGO Built-in shower mixer and shower head / Chrome

The Solos showering range combines intuitive, smart controls with a sleek, minimalist look and a variety of spray modes to create a sophisticated all-in-one showering solution. Navigo® technology in the thermostatic mixers allows you to operate the water flow of the shower with one smooth push-and-turn movement, to easily switch between rain shower and hand-spray and even to experience them both simultaneously.

Perfect harmony between pure,
minimalist design and technical expertise.

Solos includes intuitive controls on the shower mixers to easily select the different sprays of the rain shower. The Navigo® spray selector on the extra-large hand shower makes switching spray modes equally convenient.

For more flexibility, the range includes both built-in and wall-mounted models, as well as head showers in two different sizes that can be wall or ceiling-mounted and come with or without the light feature. The built-in model even features a remote control that can either be attached to the unit or installed elsewhere in the showering area.

With the light option, you can set the tone for the full spectrum shower experience. The shower head LED light control integrates with all apps and devices using any smart home apps - such as Philips Hue or Amazon Echo.

The embodiment of elegance

COLLECTION

Conca is a minimalist, yet sensual collection inspired by Ideal Standard's Conca basin of the 1970s - a range that introduced considered design to the world of the bathroom.
Smooth corners and flat, rectangular shapes lend the basins and taps their distinctive aesthetic, infusing the bathroom with understated style and quiet luxury.

Ipalyss

Enduring elegance

COLLECTION

Ipalyss truly pushes the boundaries of design with a range of beautifully elegant, ultra-thin washbasins made possible through Diamatec® technology. Characterised by a sensual expression, they stand out for their unique simplicity. Offering different shapes and a diverse colour palette inspired by Ideal Standard's historical hues, this bold combination of craft and innovation offers endless design possibilities.

Extra

Uncompromising geometry

COLLECTION

The Extra collection elevates geometric design, showcasing a striking angular aesthetic that seamlessly and harmoniously adapts to its surroundings. The range exemplifies uncompromising precision and sculptural lightness, characterised by defined, thin edges, rectangular shapes and flat surfaces.

EXTRA	Basin 120cm
JOY	Basin mixer

EXTRA
JOY
FINESSE

Basin 100cm

Joy Neo

Classic meets contemporary

COLLECTION

The collection's neoclassical aesthetic perfectly combines extravagance and modesty. The simple geometric shapes and symmetrical design provide an aura of inconspicuous luxury and understated elegance. Available in different finishes, a variety of models and with two handle styles, Joy Neo encourages creative expression.

JOY NEO

Wall-mounted basin mixer - Cross handle / Chrome

Joy Neo represents a true fusion of designs across different eras, drawing inspiration from classic bathroom pieces and seamlessly combining them with contemporary elements, delivering a new eclecticism to bathroom design.

JOY-NEO

3 tap hole basin mixer / Chrome
3 tap hole wall-mounted basin mixer / Magnetic Grey

The taps in the Joy Neo collection are versatile and sophisticated, seamlessly complementing both neo-classical ceramic ranges and contemporary minimalist lines.

Fusing classic with contemporary results in an eclectic beauty.

Joy

The extraordinary in simplicity

COLLECTION

Joy's design draws inspiration from botanical grafts, aiming to create a smooth and continuous surface that manifests in a clean and modern collection. As a single cast piece, Joy seamlessly fuses elegance and strength, presenting a minimal yet extraordinary collection that surprises with its simplicity. Designed for versatility, Joy effortlessly adapts to various spaces and styles.

JOY

Vessel mixer

The essence of genuine elegance
lies in its inherent clarity.

Joy was conceived from the idea of flexibility, both in design and usability. It's an exceptionally adaptable collection that seamlessly pairs with many different washbasins, making it suitable for a wide range of interior styles.

Showering

Creating moments of bliss

COLLECTIONS

Our showering collections transcend mere utility, offering a fusion of beauty, intelligent features, and unparalleled experiences, turning each shower into a moment of serene indulgence. From luxurious rainfall showers to customisable settings tailored to your preferences, our collections allow you to immerse yourself in a world of relaxation and rejuvenation.

Thanks to the PreciTherm thermostatic cartridge, our Ceratherm showering products maintain a consistent and precise water temperature, ensuring unparalleled safety and comfort. Combined with Idealrain overhead showers, hand sprays, and showering accessories, they create a luxurious and fully customisable showering experience.

GUARANTEE Our confidence in the quality and reliability of Ideal Standard products enables us to guarantee many of them for a lifetime. Our guarantee is offered on all products that have been used in the manner for which they were intended, and does not apply to any products that have been misused or abused in any way. Products must be installed and cared for in line with our fixing instructions and local water bye-laws. In the unlikely event the product fails within the guarantee period, we offer a free replacement or replacement part (or nearest equivalent). Liability is limited to individual products and does not cover consequential loss or damage on installation. All ceramic products are guaranteed for a lifetime. Acrylic baths are guaranteed for 25 years from date of purchase. Bath panels, furniture, mixers, taps and showers, WC suite seats and cistern fittings are guaranteed for five years from date of purchase. Parts (including push button flush valves) are guaranteed for five years and will be replaced if found to be faulty. Cistern diaphragms, seals and shower seals are not included. The guarantee is transferable 'it applies to the product not the purchaser' provided guarantee registration details are passed on to the new owner.

For full guarantee details including terms and conditions please visit **www.idealstandard.co.uk**

Ideal Standard pursue a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications without notice. Colour reproduction is as accurate as possible within the limitations of the printing process. While great care has been taken to ensure accuracy of all prices, product codes, descriptions and dimensions, Ideal Standard reserves the right to correct errors or misprints.

Ideal Standard

Our rings are an enduring symbol of Ideal Standard Group.

They represent the partnerships that happen during the process of creation; the collaborations between ourselves and architects, our engineers and customers, our craftspeople and the world's leading industrial designers of today.

They embody our balance of form and function, the elegance of our products and the timeless quality of our design.

Above all, they symbolise our overarching promise: **Together for Better.**
