Tap & Shower Collections

Ideal Standard

DESIGN BY LUDOVICA+ROBERTO PALOMBA

WHEN DESIGN
MEETS
PERFORMANCE

our awards

ONE BRAND.
OVER 100 YEARS OF EXPERTISE.

Ideal Standard's unrivalled bathroom expertise and craftsmanship are built on more than a century of creating stunning products for everyone, driven by the relentless pursuit of elegant design, technological innovation and manufacturing excellence.

PERFORMANCE-LED ENGINEERING

All our fittings are precision-engineered by us. We take great care over every part of the process at our factories across Europe. From the design development to the manufacturing and testing stages, our focus on excellence and quality materials never wavers. This is how we can guarantee perfect performance in your tap.

QUALITY THAT LASTS

We build our products to last. Everything that leaves our factories has been tested to the limit. We subject our taps to burst pressure, so we know the casting is strong and there won't be any leaks. We push our products through thermal shocks to replicate the most demanding conditions. As a mark of our confidence in our taps and for your peace of mind, our collections come with a five-year warranty¹. This is our promise of quality to you. We continue to bring this spirit of innovation to our products, producing cartridges that last for more than 750,000 use cycles, ten times the EU norm (EN817) and enough to last a family of four 20 years².

INNOVATION IS IN OUR DNA

We're focused on the future – and the evidence is in our past. In the 1960s, we invented the ceramic disc cartridge to control water flow with more durability, revolutionising the way people use bathrooms forever and making it possible to create the single lever tap.

EVERYTHING IN ONE PLACE

Through our Singular™ approach we can offer you unlimited inspirational bathroom solutions from a complete range of product categories. That doesn't just include taps and shower fittings, but also ceramics, furniture, bathtubs, trays, enclosures and accessories. It brings together our deep product knowledge, sector expertise and design services to enable you to easily choose from thousands of products and create the right solution for your space. Whatever your bathroom type, design style or specific sector requirements, Singular™ offers everything to bring these concepts to life and to easily adjust them for a tailored result.

¹ Subject to Ideal Standard terms and conditions.
² Based on five uses per day per person as well as typical water conditions and use.

Together for a better future

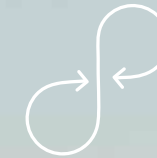

We have a strong belief that acting responsibly is fundamental to the long-term success of our business and will benefit not only our partners, customers and employees but also the wider communities in which we operate.

This is a comprehensive commitment that touches every part of our organisation, ensuring we are significantly reducing our impact on the environment, focusing on ethical conduct in business and creating a workplace that is safe and equitable for everyone.

For a better planet

Decarbonise Committed to actively work towards carbon neutrality.

Circular economy Use recyclable and sustainably sourced materials wherever feasible.

Innovation Deliver innovative products that encourage sustainable living.

For better lives

Culture Foster growth in our employees, encouraging social awareness and engagement.

Equality Operate a gender and ethnically diverse environment that ensures equality for all.

Safety Maintain world class safety standards.

For better business

Customers Safeguard supply chain resilience and customer satisfaction.

Suppliers Robust governance of supplier commitment to Ideal Standard values.

Transparency Deliver accurate, transparent and ethical reporting to all stakeholders.

Leaders in performance

From comfort and safety to hygiene, durability and sustainability, excellence in performance makes everything possible.

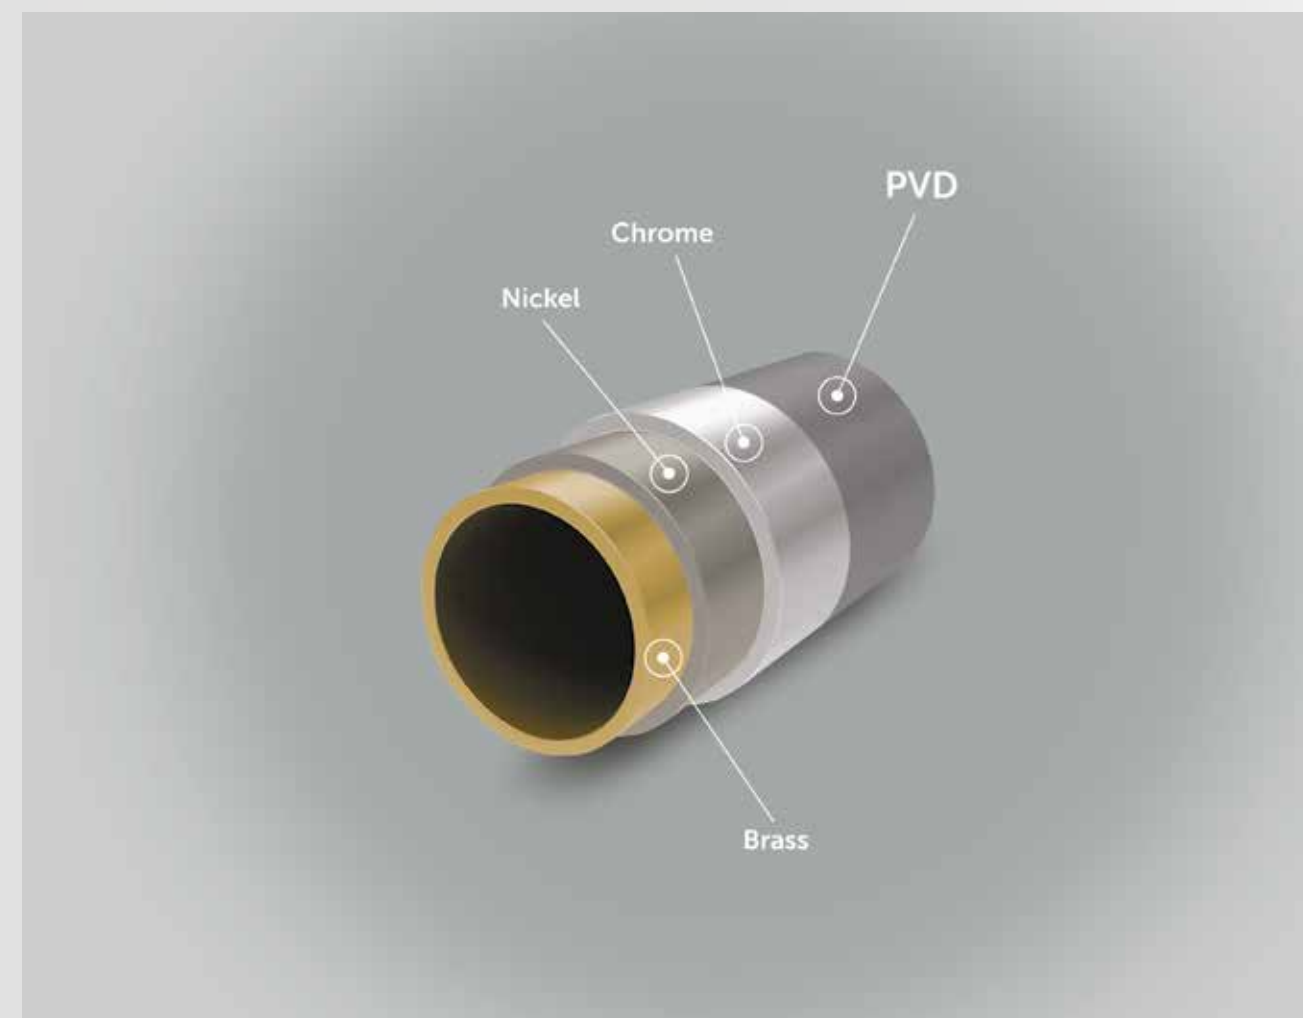

Combining experience and expertise allows us to push past limitations into new possibilities, and deliver innovations that set a new standard in washrooms and bathrooms. It's ingenuity at its best. It's leadership in performance.

PVD

Engineered for lasting colour.

Vibrant shades that last. A superior surface that withstands scratches and abrasion. Ideal Standard's range of coloured fittings uses Physical Vapour Deposition (PVD) technology to apply fine layers of metal, atom by atom. This allows us to control the composition, hardness and durability of the surface compounds that coat our expertly engineered products.

Independent testing demonstrates that PVD-finished taps from Ideal Standard are so durable, they are still free from scratches and abrasion marks after 10,000 use cycles¹. And, because we offer these shades consistently across taps, showering products and accessories, there's no compromising your design vision.

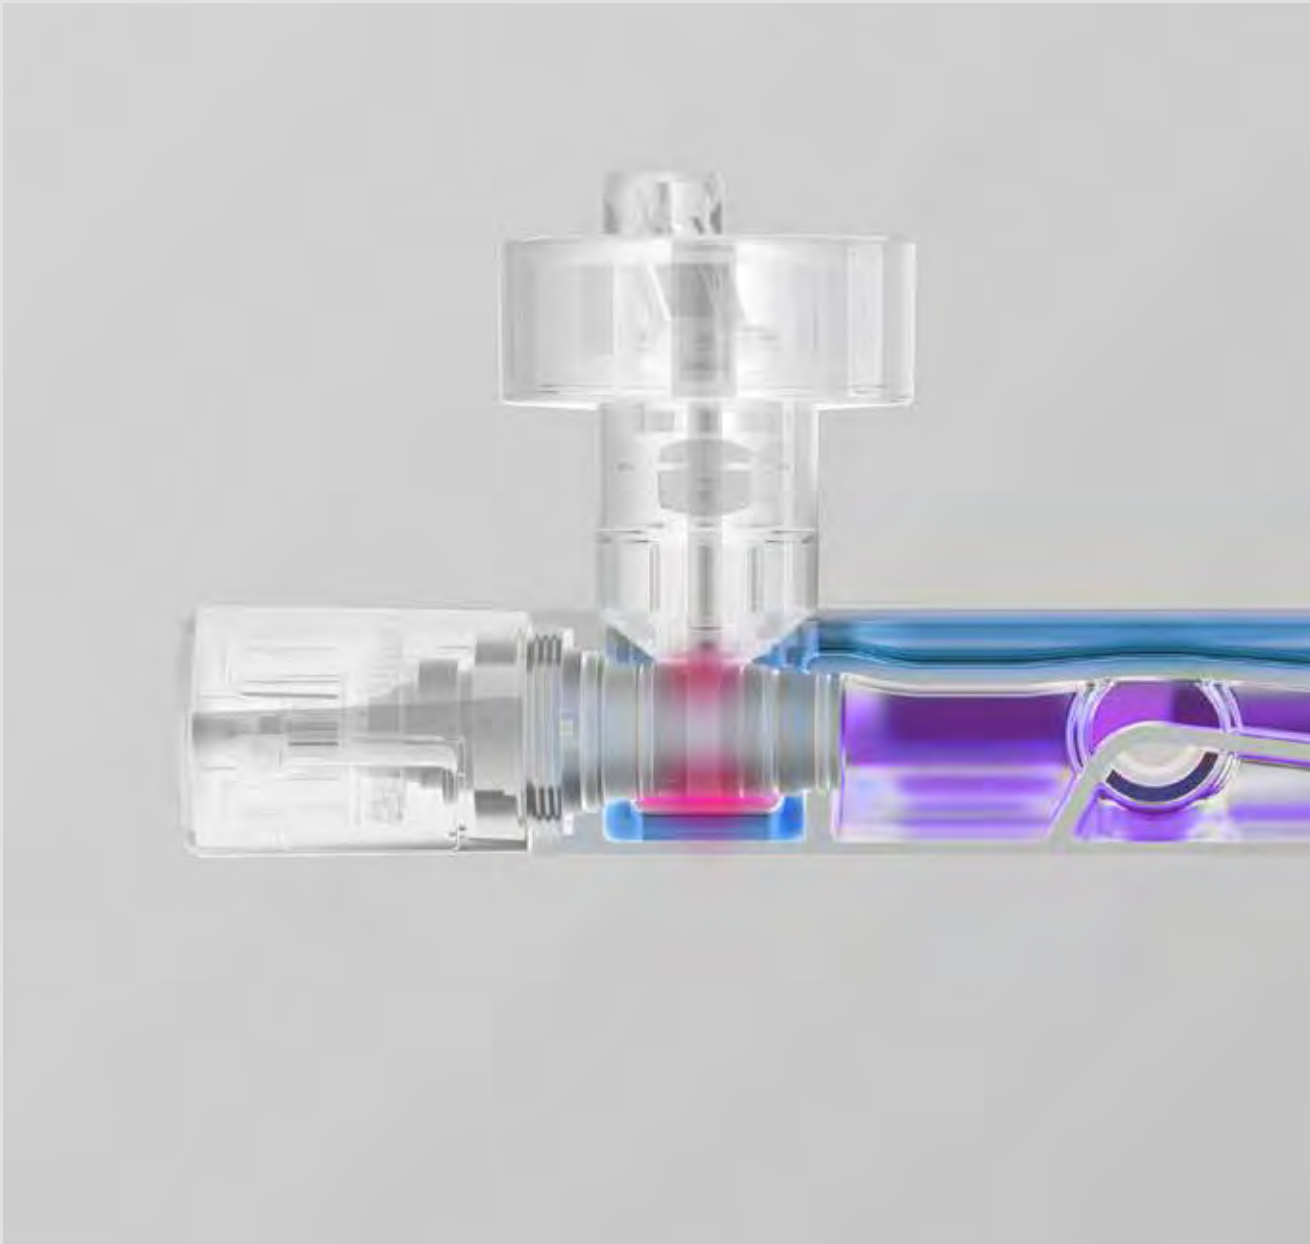

¹ Result of a hand abrasion test commissioned by Ideal Standard and conducted by Tribotron AG to international standard IEC 68-2-70 which provides a standard method of determining the resistance of surfaces and materials to abrasion arising from manual operation, such as rubbing by fingertips and hands.

CoolBody

**Engineered
to protect.**

Whatever your preferred temperature, CoolBody from Ideal Standard ensures shower mixers stay cool to the touch. Our proprietary technology ensures hot water flow is always surrounded by cold water, keeping the external surface cool to the touch.

This protects users of all ages from accidental scalding and offers total comfort of use, as the thermostat is never too hot to operate, no matter how you like your shower.

Navigo®

**Engineered
for control.**

Navigo® technology provides a superb shower experience, allowing users to control the water flow with one smooth push-and-turn movement.

Pushing the control knob starts or stops the shower, and turning the dial allows for precise control of water flow. Additionally, Navigo® allows users to experience two shower functions at the same time – the overhead rain shower and the hand spray can be used simultaneously for a truly invigorating experience.

EasyFix+ bathroom

Engineered for speed.

EasyFix+ enables fast installation in as little as half the time when compared with other standard market taps. Available on selected products from our range of basin fittings, this technology offers quick, effortless installation thanks to Ideal Standard's innovative mounting fixation. With EasyFix+, fitting is fast, fuss-free and secure.

EasyFix+ kitchen

Engineered for speed.

EasyFix+ reduces installation time by up to 50% when compared to other standard market taps, as demonstrated by independent rigorous testing. Available on our Gusto range of kitchen fittings, this technology offers effortless, tool-free installation thanks to Ideal Standard's innovative single component fixing method. With EasyFix+, fitting is fast, fuss-free and secure.

Easy-Box

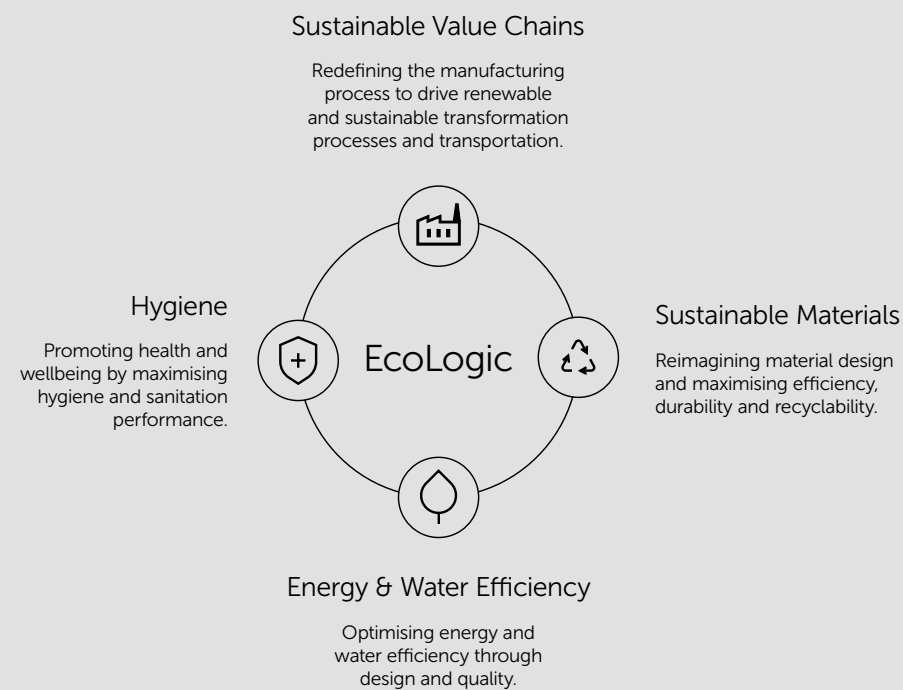

Engineered for flexibility.

Ideal Standard's flexible built-in unit simplifies the installation process and eliminates the need for any specific tools. The universal installation kit is the perfect choice for Ideal Standard's wide range of two-handle, electronic and Navigo® thermostats as well as single lever manual mixers, offering more flexibility in bathroom design. Thanks to its innovative features, the Easy-Box can adapt to any project and installation type, allowing you to create a durable and reliable showering solution.

EcoLogic

Engineered for sustainability.

By combining experience with expertise, we are able to push past limitations into new possibilities and deliver innovations that set a new standard in washrooms and bathrooms. Our EcoLogic concept makes it easier for our customers to understand the sustainable benefits of our products and focuses on four key values.

Diamatec® brass

Engineered to lead the way.

Diamatec® Brass is our most advanced brassware engineering. Made possible by the development of a much stronger, corrosion-resistant zinc-copper alloy, Diamatec Brass enables Ideal Standard to create taps with optimal wall thickness, reducing raw material consumption without sacrificing durability.

While many manufacturers are yet to begin using dezincification resistant (DZR) alloys, more than 90% of our fittings are now manufactured using Diamatec Brass. Installing Ideal Standard brassware means you can support sustainability while reducing the risk of failures and leaks, even in the toughest of water conditions.

FirmaFlow[®]+

Engineered to last.

Ideal Standard pioneered the ceramic mixer tap disc cartridge in 1969, revolutionising the way people use bathrooms forever and making it possible to create the single lever tap.

Some 50 years on, the evolution of this innovation, FirmaFlow[®]+, continues to set the standard for ceramic discs through exceptional engineering and extraordinary durability, offering heat resistance up to 90°C. FirmaFlow[®]+ delivers incredibly smooth operation for 750,000 cycles, ten times the EU norm (EN817) and enough to last a family of four 20 years*.

750.000+

full use cycles, 10x the European norm (EN817)

90° C

heat resistant

20+ years

of daily use for a family of four*

*Based on five uses per day per person as well as typical water conditions and use. Test results only apply to our 38mm cartridge.

PreciTherm[®]

Engineered for comfort and safety.

Ensuring the ultimate shower and bath experience, the PreciTherm[®] thermostatic cartridge offers unrivalled levels of durability, safety and performance. Created to prevent potentially harmful fluctuations in water temperature, Ideal Standard's intelligent engineering prevents sudden surges of hot or cold water from causing discomfort or, at worst, scalding.

Rises or drops of up to 20°C are possible with non-thermostatic mixer valves, when a toilet is flushed or a hot tap is run elsewhere in the building, for example. With PreciTherm[®], the maximum fluctuation is 1.5°C for up to two seconds before the temperature re-balances.

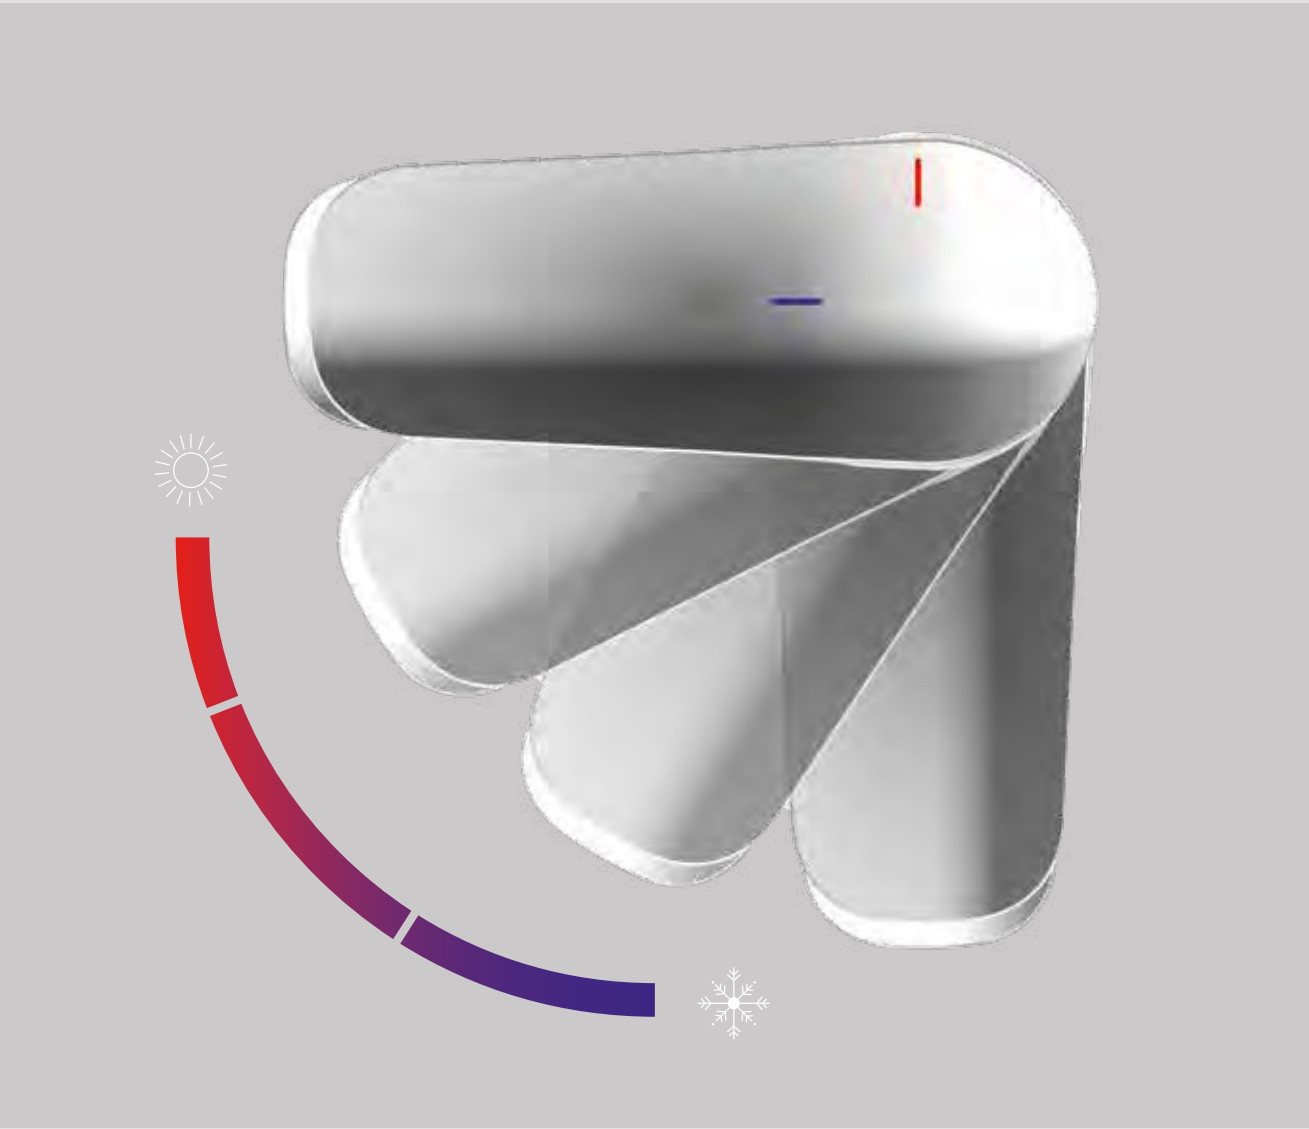

BlueStart®

**Engineered
for energy savings.**

BlueStart® technology enables significant energy savings as only cold water flows when the tap is used with the lever in the centred position.

With standard taps most people turn on the water in the mid-lever position, resulting in a mix of hot and cold water. But very often warm water isn't needed at all. Cold water is usually sufficient for washing hands, brushing teeth or cleaning. BlueStart® technology avoids this unnecessary warm water use, reduces energy consumption, lowers CO2 emissions and saves money.

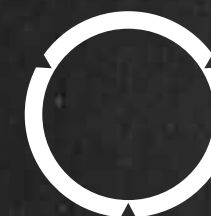

BlueStart® iX

**Engineered for energy
and water savings.**

BlueStart® iX is the technology behind our leading-edge iX tap ranges, which offer a smart two-in-one solution, by combining the energy saving benefits of our BlueStart® technology with the hygiene and water-saving features of a touchless tap.

BlueStart® iX offers significant energy savings as only cold water flows when the touchless function is used which is usually sufficient for brushing teeth, washing hands or cleaning. Additionally, it helps save water as the flow stops automatically as soon as the user removes their hands from the sensor detection area. This also reduces the need for cleaning and avoids the spread of germs by touching the tap with dirty hands.

The BlueStart® iX technology is available in a variety of different designs, colours and sizes, offering a flexible, practical and environmentally friendly solution for modern bathrooms.

Singular™
from Ideal Standard

SINGULAR™ IS WHERE IT ALL COMES TOGETHER

From inspiration to installation, Singular™ is our end-to-end journey for creating endless cross-category washroom and bathroom solutions for all of our customers. It's built on our understanding of customer and sector needs, and brings together our specification expertise, design and performance to create solutions that make life easier for everyone.

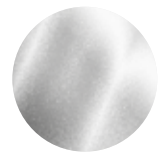

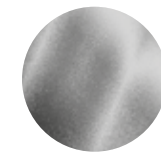

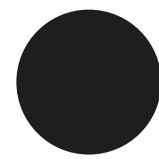

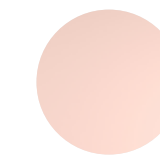

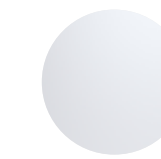

ENDLESS CHOICES.
ONE SINGULAR™ JOURNEY

A PALETTE OF CREATIVE POTENTIAL

RECOMMENDED COMBINATIONS

A carefully considered range of finishes, selected to offer you freedom of creative expression.

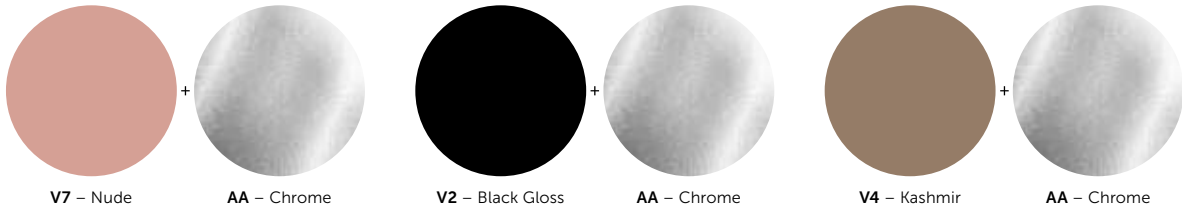

CERAMICS

Ten new ceramic colours join White Gloss and White Silk to offer a complete palette that brings a sense of emotion to bathroom interiors. Some colours hark back to historical Ideal Standard designs but with a contemporary and elegant finish, while others are entirely new and have been designed to complement popular modern materials, such as marble and stone.

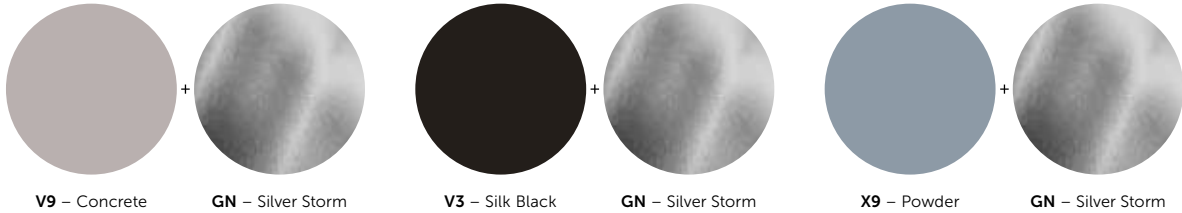

BRASSWARE

The finishes within our brassware palette can be combined with our ceramics and furniture to create strong visual statements – the perfect synergy between shape, material and colour. PVD-finished taps from Ideal Standard are so durable, they are still free from scratches and abrasion marks after 10,000 use cycles¹.

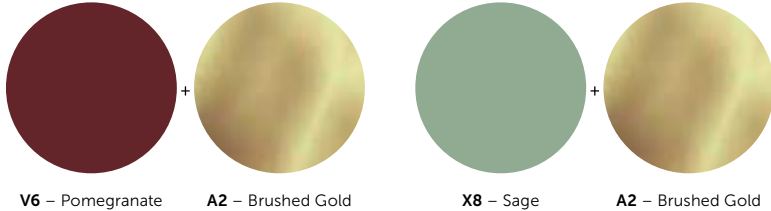

¹ Result of a hand abrasion test commissioned by Ideal Standard and conducted by Tribotron AG to international standard IEC 68-2-70 which provides a standard method of determining the resistance of surfaces and materials to abrasion arising from manual operation, such as rubbing by fingertips and hands.

SOLOS

The radical essence
of minimalism

PURITY IN DESIGN

Reflecting the beauty of simplicity, Solos' minimalist yet sensual design transmits a feeling of lightness and timeless elegance. Fine, straight lines and extremely thin edges give the basin its distinctive weightless look, while the fully integrated sophisticated fitting completes the seamless, pure appearance.

SENSOR BASIN MIXER

A truly innovative and visually striking statement piece, Solos is a unique integration of basin and brassware. Made possible by Ideal Standard's technical excellence and manufacturing expertise, the perfect simplicity of the design conceals a raft of technological innovation, hidden within the body of the ceramic.

Solos features leading edge sequential mixer technology, allowing both accurate temperature and flow control in one simple rotation of the elegant control knob. The range also includes touchless technology with capacitive sensors for the ultimate in hygiene and ease of use.

- Designed to make a statement with its simplicity
- Choose from mechanical and electronic operation
- Tap available in six colours, with matching shower and accessory options

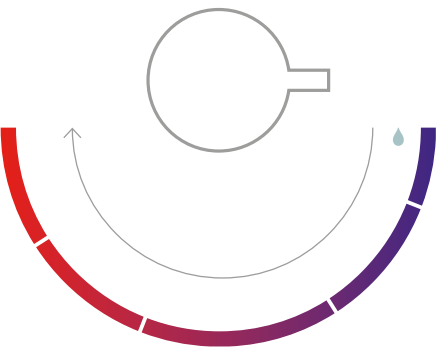

SOLOS

CONCA

Sequential basin mixer
Basin 100 cm
Console - Light Oak

SOLOS IS PACKED WITH HIDDEN TECHNOLOGY THAT QUIETLY MAKES LIFE BETTER. HERE'S WHAT OUR SEQUENTIAL VALVE AND CAPACITIVE SENSOR DO FOR YOU

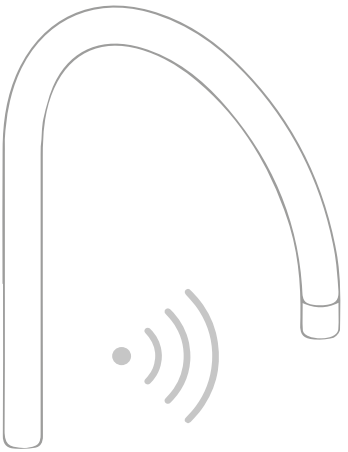

SEQUENTIAL VALVE

A sequential valve creates a tap where turning a single handle or lever controls both water flow and temperature. They are simple to operate and are often used in taps for accessible bathrooms and washrooms.

Here's how they work: Turning to the right closes the valve and shuts off the water. Turning progressively to the left first delivers cold water, then warm water and fully to the left hot water.

Please note: A special basin with small holes is needed for the Solos tap with the Ø20mm spout and Ø30mm handle.

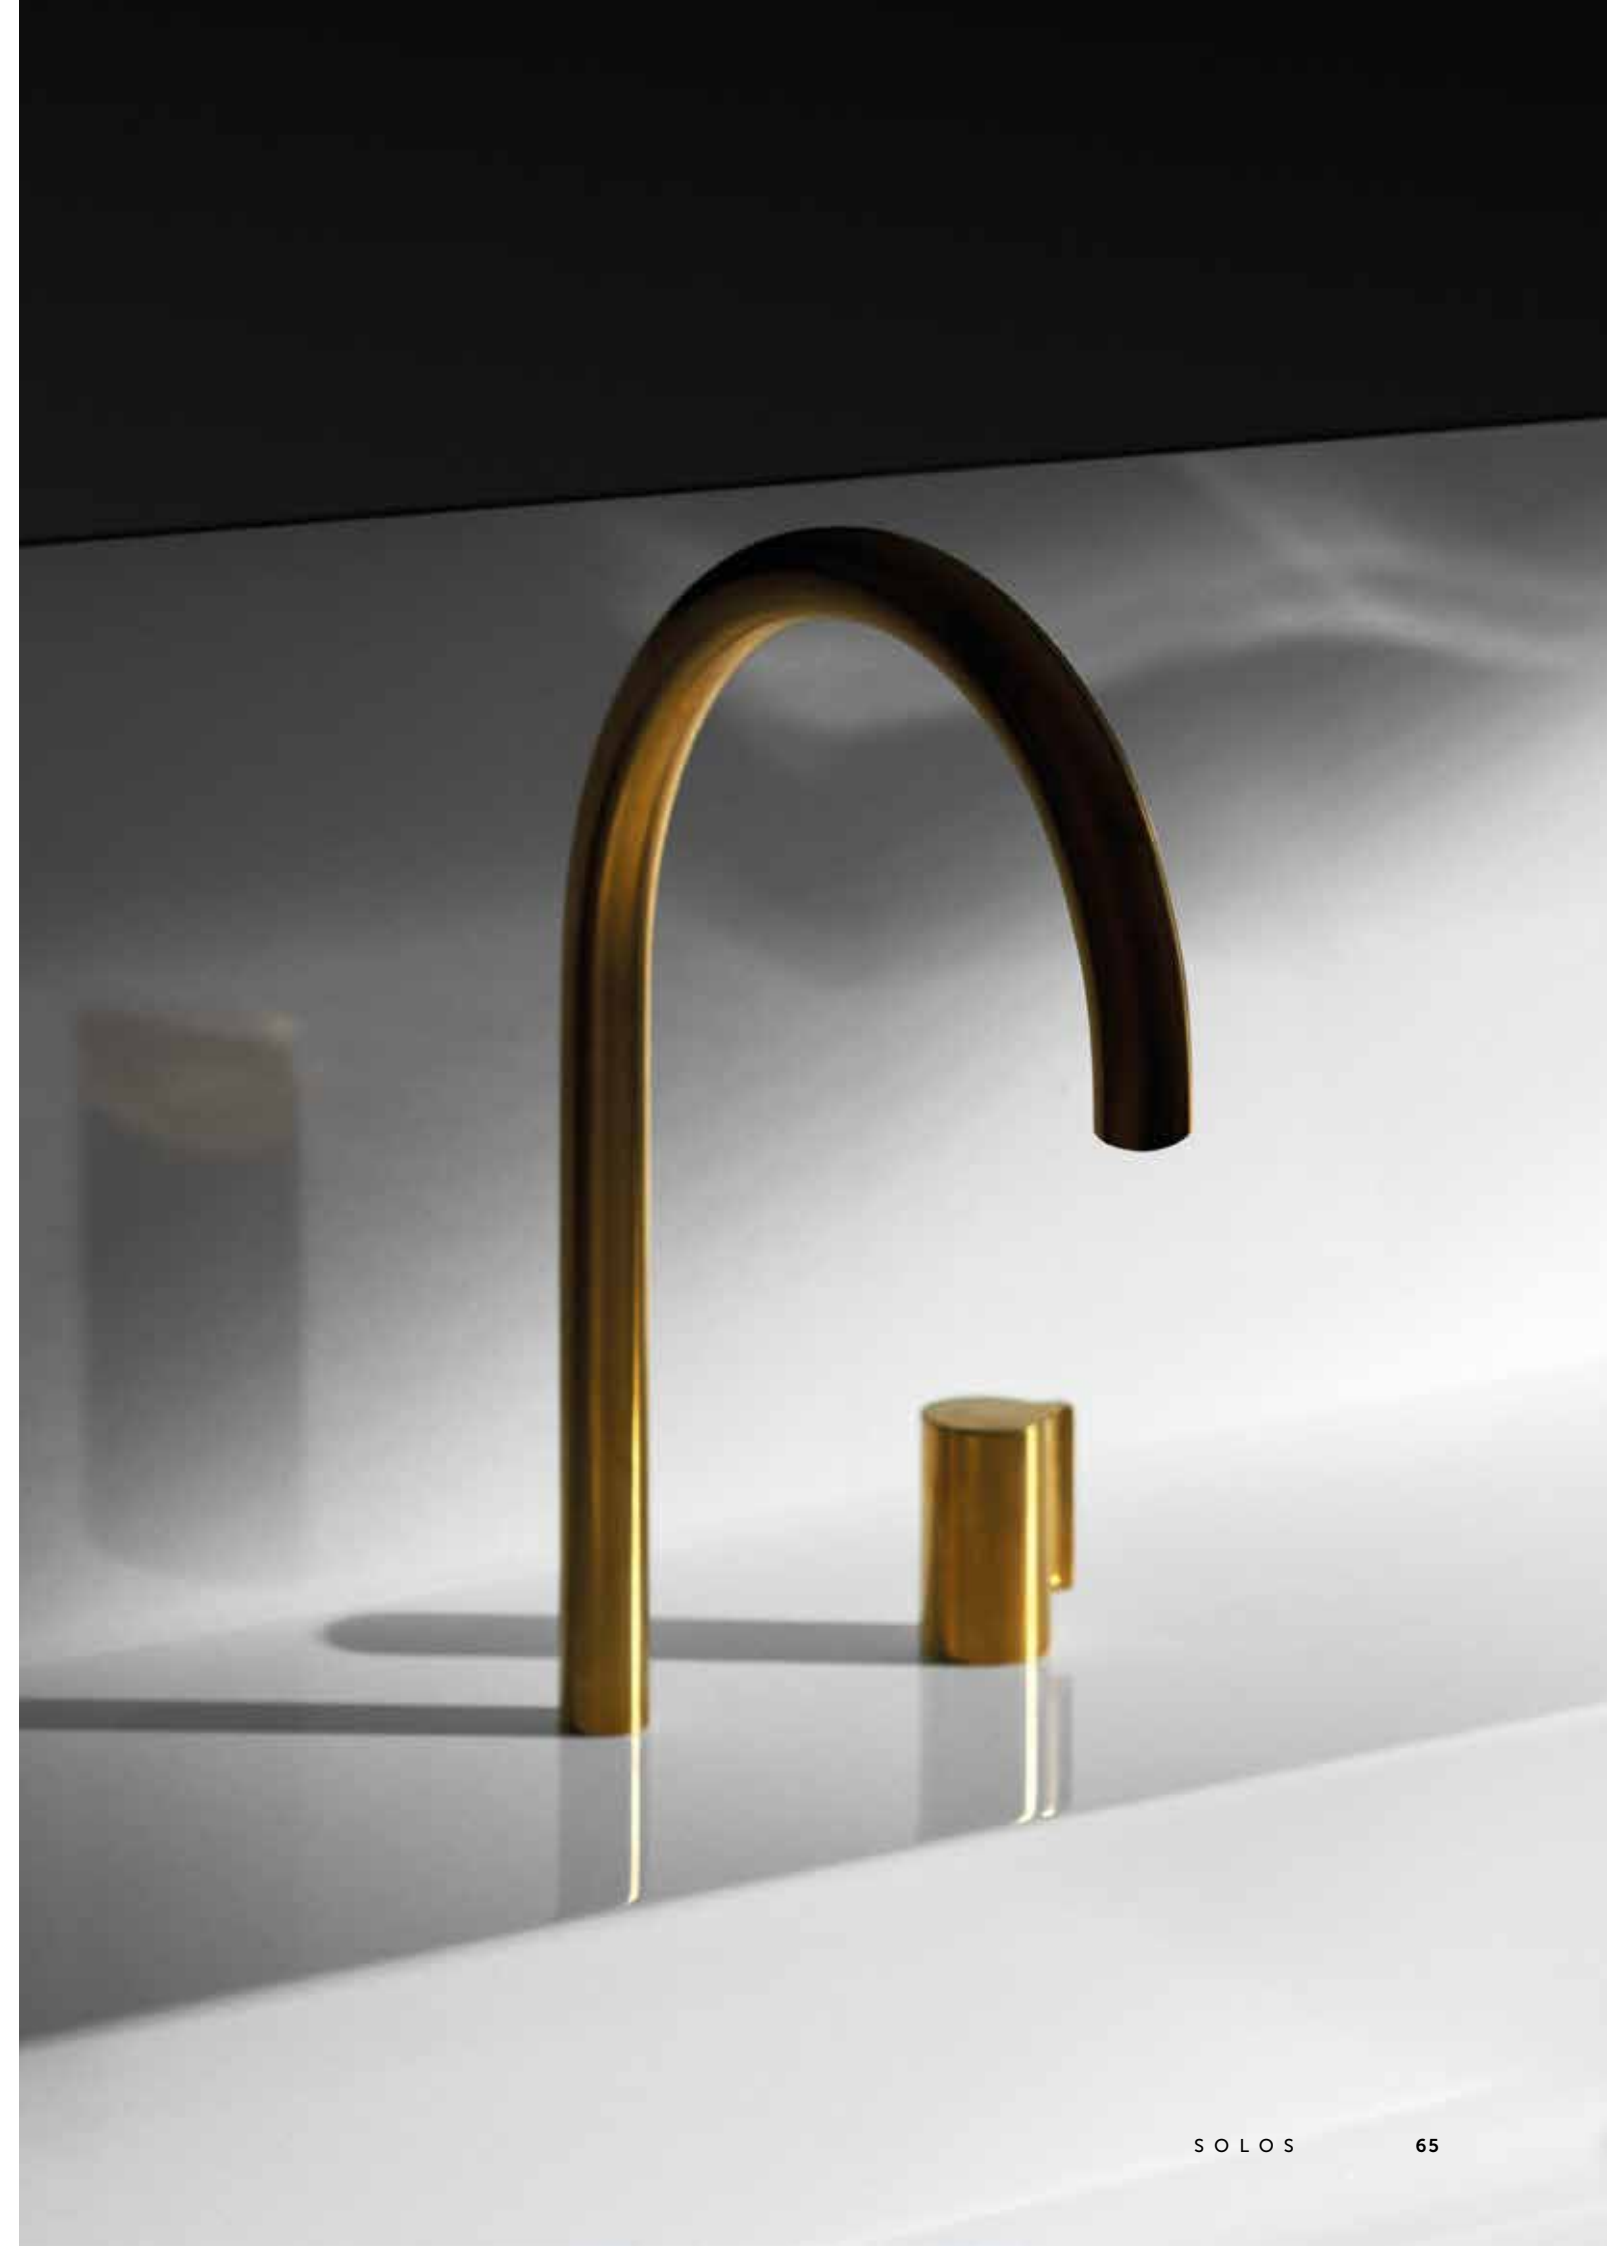

CAPACITIVE SENSOR

Capacitive sensors are not visible, unlike infrared sensors, offering opportunities for sleeker, more minimalist design.

Here's how it works: One electrode is attached to the spout and another to the wall under the basin. A thermostatic pre-mixer is installed on the angle valve to the wall. The sensor has three levels of sensitivity which can be adjusted after installing with the control button on the sensor box. Touchless detection starts and stops the water. Water starts to flow when the hand approaches the spout from any direction and stays on as long as the hands are within range.

PERFECT HARMONY BETWEEN PURE,
MINIMALIST DESIGN AND TECHNICAL EXPERTISE.

EXTRA

Uncompromising
geometry

BASIN MIXER

Extra is next level geometric design, with a striking angular aesthetic that reflects Ideal Standard's ceramic range of the same name. This is the first of our Atelier Collections to feature such uncompromising geometry, strong lines characterised by sharp edges and flat surfaces.

A comprehensive and flexible range, Extra fittings include basin and wall-mounted mixers, bidet taps and a freestanding bath mixer. It can be paired with showering collections such as Navigo® and Ceratherm C100, which are also available in minimalist square designs.

- Sharp edges and flat surfaces
- Available in four colours, with matching shower and accessory options
- Comprehensive range

JOY

Joy fuses elegance and strength
into a minimal aesthetic.

SIMPLICITY IS THE ESSENCE
OF TRUE ELEGANCE

VESSEL MIXER

A single cast piece inspired by botanical grafts, Joy was born to be understated and flexible. This versatile range will quietly allow the basin to take the spotlight or will itself stand out with a range of five finishes to complement and contrast with the ceramic.

Joy is built with Ideal Standard's expert engineering, honed over more than a century of perfecting our craft, offering a huge variety of basin and baths taps and shower mixers.

CONNECT AIR

Freshness
and lightness

BASIN MIXER

Tapering and curved; fresh and light. Connect Air is characterised by these qualities, fusing classic geometry with shapes that transition organically from each other. The aesthetic is of contemporary elegance, minimalist straight lines complemented by hints at softer, rounded edges. All with a sense of weightlessness.

Beyond its light appearance, Connect Air has been engineered to last.

- Sleek, contemporary aesthetic
- High performance FirmaFlow® disc cartridge
- Basin, vessel and wall-mounted taps plus showering options

MORE ABOUT
CERAPLAN

BASIN MIXER iX - CERAPLAN

i.SERIES

The iSeries is a collection of hybrid washbasin mixer taps which offer safe and touchless use along with superior performance and expert engineering. Significant water and energy savings are delivered by Ideal Standard's patented BlueStart iX technology as only cold water flows when the touchless function is used, which is usually sufficient for brushing teeth, washing hands or cleaning.

iSeries combines the comfort and hygiene of touchless fittings with the control of a normal mixer, which allows the user to select hot or cold water. These taps are available in Chrome or Silk Black finishes.

Singular™ is the ultimate cross-category solution, offering a vast array of ideas for projects in any sector or environment. Here, Ceraline is paired with the elegant yet youthful curved design of i.life B sanitaryware.

From design to installation, our varied portfolio offers endless possibilities. Take inspiration from Singular™ and then make it your own.

CERAFINE D

Cerafine D has an elegant design, combining smooth, rounded corners with high-performance engineering. Whether you're modernising your bathroom or adding a stylish touch to your shower, this range will help you make a contemporary statement.

Cerafine D taps have been crafted with a larger comfort area below the aerator, improving ergonomic performance. This makes them easier to operate while the SmartShine® finish results in easier cleaning too.

- Smooth, rounded design
- Ergonomic comfort area
- Wide range of basin and bidet taps

MORE ABOUT
CERAFINE D

CERABASE

Simple, beautiful, affordable. Cerabase packs a lot of technology inside its unassuming exterior. Water flow and temperature are precisely controlled by Ideal Standard's FirmaFlow® ceramic disc cartridge, offering supreme durability.

Cerabase also offers outstanding sustainability credentials, with packaging that uses no plastic and features 5 l/min aerators to help save water.

- Simple, understated design
- Built to last over 500,000 use cycles
- Range of basin mixers

SHOWERING

Relax or invigorate.
Shower your way with gentle massage or
enlivening sprays.

The showering range from Ideal Standard is
anything and everything you want it to be.
The spa experience at home.

SOLOS

The radical essence
of minimalism

HEAD SHOWER

Rain

An enlivening and powerful spray which invigorates the entire body. Perfect for an energising morning routine or a relaxing evening cleanse.

SilkRain

Thousands of ultra-fine water droplets that envelope the body in a silent spa-like steam experience that is at once indulgent but also saves on water.

2nd Skin

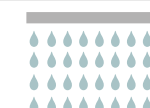

Wrap yourself in relaxation with this slim stream of water, a fluid flow which enfolds the body in the pleasant sensation of warmth gliding gently across the skin.

HAND SHOWER

Rain

SilkRain

Active massage

Working like a masseur's expert touch, four rotating jets wander over the skin to relieve stress or create a spa-like treatment after sport or exercise.

A shower system offering superior sophistication, with three different water jets for every need. A light integrated in the overhead shower amplifies the relaxing effect by creating a sensual and soft atmosphere. The shower head with light has a sensor that automatically recognises when someone enters the shower and warm-white light is turned on. Switching off automatically after showering.

Solos features built-in Easy-Box® thermostatic valve for that sleek, minimalist look and a remote control to select from Rain, SilkRain and Active Massage spray modes.

Or make a design statement with the stylish exposed shower system, with Navigo® Solos push-and-turn control technology and the practical benefits of a shelf.

Solos also allows you to tailor the accessories, with a choice between 1 or 3 function 300mm XXL rainshower heads and extra large 130mm hand shower with Navigo® control to choose between SilkRain, Rain and Active Massage functions, both with easy clean nozzles.

- Different options to suit your creative vision
- PreciTherm® cartridge for comfort and safety
- Choice of concealed and exposed shower valves

ALU⁺

A personal
showering experience

Alu+ is a youthful showering range, which is as creative and expressive as you want it to be. Available in three low-sheen finishes – Silk Black, Rosé and Silver – this collection seamlessly blends long rectangular lines with perfect circles for a look that's both striking and fun.

Not purely about aesthetics, Alu+ features useful practical touches, including storage shelves and matching beauty bars. Furthermore, the range is 100% free from chrome, lead and nickel and made from high quality, recyclable aluminium. The shower systems can be paired with matching basin fittings in the same colours and style.

- Three colour finishes
- Two function rainshower and handspray
- Basin mixers to complement the look

ALU+
ULTRAFLAT S i.life

CERATHERM S200

Designed to shape
shower space

Ceratherm S200 brings together outstanding performance with practicality that makes the most of your shower space without compromising on aesthetics. The exposed thermostatic mixer features an integrated shelf of safety glass for a clean look, which adds valuable storage space in your bathroom.

Easy to control, thanks to knobs positioned on the front, Ceratherm S200 features Ideal Standard's PreciTherm® thermostatic cartridge, which prevents sudden fluctuations in hot or cold water. The range is available in Chrome and Silk Black finishes as a shower system with fixed rainshower and handspray and also as a hand shower and rail combination.

- Contemporary Chrome and Silk Black finishes
- Convenience of integrated storage
- Shower system and rail options

CERATHERM S200

CERATHERM C100

A statement
cube design

A minimalist aesthetic with bold geometric design, flat surfaces and extra-large heads, these are high-end showers that become a statement piece in your bathroom. Ceratherm C100 performs beautifully too, with safety and eco buttons on the handle which are flush to the surface for consistent design but which are still easy to push.

- Bold geometric design
- CoolBody technology for improved safety
- Available as shower pack and dual shower system

CERATHERM T125

Design and functionality
in one

This is minimalistic cylindrical design created with simplicity and elegance. Ceratherm T125 features a two in one pin handle with easy grip and integrated ceramic diverter to select handshower or rainshower, all housed within a leaner, more compact body.

EasyFix rails make for simple installation and ease of use, while CoolBody technology ensures a safer shower by keeping the external surface cool to the touch. On the inside, these showers feature Ideal Standard's PreciTherm® cartridge for accurate temperature control that makes every drop of water count.

- Slim, cylindrical design
- CoolBody and PreciTherm® technology
- Shower and dual shower options available

CERATHERM NAVIGO®

A range
of choices

WHEN DESIGN
MEETS PERFORMANCE.

Navigo® technology allows users to control their shower with one smooth push and turn of a button to start the flow of water and control the water volume at the same time. Built into Ideal Standard's Ceratherm collection of thermostatic shower mixers, this is a sleek, innovative system that delivers comfort, performance and style. Ceratherm Navigo® is available with one or two control knobs and with square or round faceplates to suit your bathroom's aesthetic. With Chrome, Silk Black, Magnetic Grey, Brushed Gold and Silver Storm finishes to choose from, this is your opportunity to express your creativity. Not just an elegant design, Navigo® also simplifies the saving of water as well as offering a 2 outlet version which allows the simultaneous use of the head and hand shower for the ultimate luxury experience.

GUSTO

Life happens
in the kitchen

SINK MIXER - 2 HOLE

Ideal Standard's Gusto range is the epitome of elegant, contemporary design that stands out but fits in. Precision engineering and manufacturing expertise borne of more than a century at the forefront of our industry. Robust and durable, able to withstand the demands of home and restaurant alike.

A collection that's all about taste, this range offers a depth of finishes to suit any kitchen, with striking square and flowing round aesthetics in Chrome, Sunset Rose, Magnetic Grey, Silver Storm and Brushed Gold.

Ideal Standard is at the leading edge of brassware innovation where hygiene, cleanliness and convenience are key. Our iMX technology helps keep kitchens neat and tidy, avoiding mess and making your everyday that bit easier.

An integrated soap dispenser with easy-to-use push button allows you to have washing-up liquid always within reach, removing the need for separate bottles or containers. One simple press of the button delivers the soap, easily operated with the palm or back of your hand to improve cleanliness around food preparation areas and help stop the spread of germs.

SINK MIXER WITH INTEGRATED SOAP DISPENSER

Ideal Standard now brings over a century of brassware engineering expertise into the restaurant kitchen. Our PRO and SEMI PRO sink mixers offer outstanding performance and durability, including pull-down sprays with integrated magnets for easy fixation and dual mode options that work just how you need them to.

Ideal Standard's precision-engineered FirmaFlow+ cartridge will ensure your taps withstand the demands of a busy kitchen for hundreds of thousands of use cycles. Built to withstand the most demanding environments, our PRO and SEMI PRO kitchen taps are right alongside you, service after service.

CERAPLAN

Re-designed for the modern world, Ceraplan is now slimmer, simpler and smoother than ever. This is the evolution of a classic piece, with long-lasting construction and design which achieves a beautiful balance of style and technology.

The Ceraplan collection features IdealComfort, meaning it comes in a variety of heights to ensure the space between tap spout and sink meets your everyday requirements.
