

Bespoke Street Furniture

Crafted With Precision

Adaptable, Affordable External Furniture Solutions

We understand that each project has unique challenges, where managing costs, meeting strict regulations, and delivering high-quality projects are paramount. With nearly 30 years of experience in street furniture, we're not just a supplier—we're a partner. Our customer-first approach allows us to collaborate closely to assess project needs and tailor products to meet design, performance, environmental, and cost goals. We help contractors, architects, and clients create stylish, affordable street furniture that complements landscaped areas and elevates the overall aesthetics of the scheme.

01

Design

CUSTOM PROPOSALS

We assess your needs and offer tailored solutions, including site visits for detailed evaluation, and a competitive proposal.

02

Manufacture

PROJECT MANAGEMENT

Our team prepares technical drawings and coordinates with your site to ensure smooth production and delivery.

03

Delivery & Installation

FLEXIBLE

Choose supply-only with assembly instructions or full installation by our expert team, tailored to site conditions.

PRODUCT QUALITY

A Diverse Product Range

All our products can be fully customised to suit site specific requirements. We use a range of different timbers, recycled plastics and composite materials. We offer galvanised and powder coated steel alongside a corten range. We also focus on sustainable options such as PV Structures, Sedum Roof Shelters and Wildflower Roof canopies.

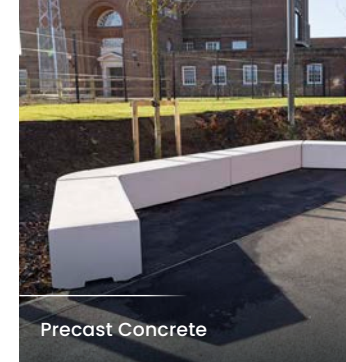

Our ISO 9001 and ISO 45001 certifications reflect our commitment to quality and continuous improvement, consistently maintained by our reliable supply chain. Each product is accompanied by detailed technical specifications, including installation and foundation guidelines, and is backed by warranties. Our expert design and manufacturing teams take pride in every product that leaves our facility.

SERVICE EXCELLENCE

Responsive & Approachable Communication

We prioritise delivering the best customer experience. Langley Design offers responsive service from enquiry and quotation, right through to installation, keeping you informed throughout. We have a strong reputation within the construction industry of being approachable and flexible and it's something we value.

Our sales, technical, manufacturing, and installation teams have extensive experience and are ready to help you overcome challenges and achieve your goals.

CYCLE SHELTER Aureus School

“ A successful stress-free installation which has been noted. **I believe that open communication from day one was a major contribution to a smooth delivery.** This was despite site delays caused by our client which we worked though together to achieve a result. ”

— BAM CONSTRUCTION

ACCOYA BENCHING INSTALLATION
Wellcome Genome Campus

An aerial photograph of a courtyard featuring several wooden benches of various shapes and sizes arranged on a light-colored paved surface. The benches are made of horizontal wooden slats and have dark, sturdy legs. Some benches are long and straight, while others are L-shaped or rectangular. There are four small trees planted in square planters, each with a dark border. The courtyard is surrounded by a low wall and some greenery. The word "BESPOKE" is written in the top left corner.

BESPOKE

Designed to Fit

Our furniture is designed with flexibility in mind, allowing for custom size adjustments or fully bespoke creations. Whether you need minor modifications or a completely tailored solution, we work closely with you to bring your vision to life. Every piece is made to order in the UK and can be adjusted to fit your space perfectly.

OUR CLIENTS

Trusted Partnerships

Exceptional results through client collaboration: Highlighting Our Partnerships with Architects and Contractors.

Our Environmental Commitment

SEDUM ROOFING

A green roofing option that not only enhances visual appeal but also promotes environmental sustainability by increasing biodiversity and leaving a positive ecological footprint.

Our commitment to sustainability is seen through the decisions we make at both a strategic and operational level. We operate an internal Think Environment Initiative. We consider the lifecycle impact of the materials used within our products, designing, and manufacturing durable and hard-wearing furniture. We currently use sustainable materials such as recycled plastic, sedum, wildflower, and green roofs. All timber is responsibly sourced, either PEFC or FSC certified. We continually explore new materials, with Accoya and Thermowood becoming popular choices in recent years.

Next up, we're working towards the Environmental Management Certification, BS EN ISO 14001:2015, underlining our commitment to continuous improvement and environmental stewardship.

RECYCLED PLASTIC

Made from recycled silage wrap collected across the UK, this is a durable, low-maintenance alternative to timber that doesn't degrade.

WHO WE ARE

A Customer Focused Culture

Langley Design is based in Wiltshire, and has been serving architects, contractors and the construction industry across the UK for nearly 30 years. In late 2023, Langley Design became the first Street Furniture manufacturer to become Employee Owned.

Employee ownership allows us to preserve the customer focused culture we value. Langley employees are passionate about delivering high quality projects. We have built deep expertise, market insight, customer relationships and deliver an excellent service to our customers. This is what makes us different and everyone's contribution is recognised and valued.

Proudly
employee
owned.

“ Businesses that give employees a larger say create a common purpose, which leaves them in a better position to adapt and evolve to deliver great business impacts. ”

— JAMES DE LE VINGNE
Chief Executive,
Employee Ownership Association
