

WASTEWATER AERATION SOLUTIONS FOR HIRE

Efficient. Reliable. Sustainable.

MEETING YOUR WASTEWATER NEEDS, ON YOUR TERMS

Unexpected breakdowns, planned upgrades or seasonal load increases can severely impact your wastewater treatment process, leading to non-compliance, reputational damage and operational losses.

Our flexible aeration hire service provides the perfect solution, delivering reliable, efficient equipment exactly when and where you need it. Avoid costly capital expenditure and operational downtime with our rapid-response rental packages, designed for both long and short term needs.

Aquatreat
Aquatreat Environmental Products Limited

WHO IS THIS FOR?

Our nationwide aeration hire services are ideal for a range of clients, including:

Municipal sewage and industrial wastewater plants: For managing seasonal variations, emergency equipment failures or planned maintenance and upgrades.

Food and drink processors: To support temporary increases in production and manage the associated higher effluent wastewater load.

Residential or commercial sites: For temporary or long-term wastewater treatment, from construction sites to tourist destinations.

Engineers, contractors and consultants: Seeking a reliable, temporary solution for their clients while permanent systems are designed and installed.

WHY CHOOSE AERATION HIRE

Eliminate capital expenditure (CAPEX): Avoid the high cost of purchasing equipment outright and instead use your operational budget to solve immediate problems.

Ensure compliance: Maintain effluent consent levels and avoid fines, even when facing unexpected plant failures or seasonal demand spikes.

Enable planned maintenance: Continue operations smoothly during scheduled maintenance, repair or refurbishment of your existing plant.

Respond to emergencies: Receive immediate deployment of high-efficiency aeration systems to quickly address unexpected breakdowns or pollution incidents.

Increase capacity instantly: Meet temporary peaks in flow and load without investing in new permanent infrastructure.

Optimise energy efficiency: Rent the most energy-efficient equipment available on the market to help reduce operating costs and support your sustainability goals.

Minimize downtime: Our modular systems are designed for quick and easy installation, with operational readiness often within hours of arriving on site.

AERATION HIRE EQUIPMENT AVAILABLE

We have a comprehensive fleet of high-quality, efficient aeration equipment suitable for all types of application. We only provide the most efficient temporary aeration available on the market. This means you always get the highest oxygen transfer efficiency achievable combined with the lowest power consumption. More sustainable at least cost!

OUR EQUIPMENT INCLUDES

High-efficiency diffused aeration: Includes highly efficient fine bubble aeration grids as well as coarse bubble aerator options, blowers with acoustic enclosures and ancillaries available for rapid deployment and minimal disruption to your plant.

Aeration equipment for all types of application: Diffused aeration grids are available to suit all types of tank or lagoon:

- **Self weighted drop in aeration grid** to sit on the base of a tank, channel or lagoon
- **Aeration grid with legs** to raise the unit above any items on the base of the tank e.g. pumps or pipework etc.
- **Float mounted aeration grid** for applications where there is existing fixed floor diffused aeration in place or for applications with fragile bases e.g. lagoons with geotextile liners

Complete equipment packages: We can supply aeration grids only to connect to your site airmain through to a complete stand alone aeration package for your site. Options include diffused aeration, blowers, interconnecting pipework, generators and fuel supply, Dissolved Oxygen (DO) control of the system as well as installation, commissioning and removal services to ensure a complete, seamless solution.

COMPREHENSIVE SERVICE & SUPPORT

We offer more than just equipment. Our experienced team provides end-to-end support to ensure your project's success:

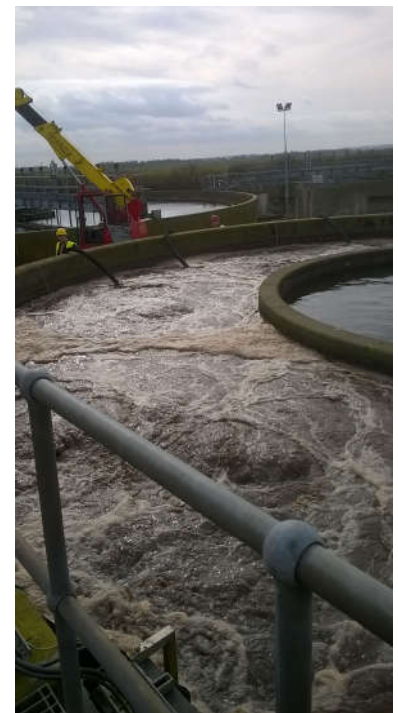

Initial consultation and site audit: Our experts will assess your specific needs and recommend the most effective and efficient hire solution.

Tailored design and project management: We can handle the design, delivery and installation of the system with minimal disruption to your existing operations.

Flexible hire options: Choose from a range of short-term and long-term rental contracts to suit your budget and project timeline.

Expert installation and commissioning: Our skilled engineers ensure your system is installed correctly and operational quickly.

Ongoing maintenance and monitoring: Our hire contracts include full maintenance and we offer optional performance monitoring for your peace of mind.

Ensure your wastewater treatment process runs smoothly — even during unforeseen challenges. Contact us today for a free site assessment and no obligation hire quotation.
