

Door Guard Thin Stainless Steel

AUTOPA Door Guards are designed to protect walls from being damaged by swinging doors. An integrated rubber stopper acts as a shock absorber, preventing the door from hitting the steel frame. Ideal for commercial and industrial sites, they are suitable for internal and external use and can be installed either individually or in pairs.

Extremely durable, AUTOPA's Door Stops are manufactured from Stainless steel and available with flange plates for bolting down or extended legs for casting into concrete.

Central rubber stopper.

Part Number	Description	Weight (kg)
138 206 039	Door Guard Thin - Concrete In	9kg
138 206 034	Door Guard Thin - Bolt Down	11kg

Product details

- 2mm wall thickness
- 900mm x 345mm (height x width)
- Concrete in 300mm (below ground)
- Round flange plate – 120mm x 5mm
- 6 bolts required per door guard (bolt down)
