

P&P Dosiertechnik GmbH

Development • Engineering • Manufacturing • Sales of process equipment
POLYCOMPACT, Polymer Unit PD (Three chamber system)

POLYCOMPACT, Type PD is a dissolving and dosing system for organic flocking aids. It is designed as a three chamber cross flow unit for continuous preparation and provision of an equally concentrated polymer parent or post solution and is manufactured in different sizes and with several options.

POLYCOMPACT, Polymer Unit PC (Two chamber system)

POLYCOMPACT, Type PC is a dissolving and dosing system for organic flocking aids. It is designed for the continuous preparation and provision of an equally concentrated polymer parent or post solution in a time – controlled reciprocal load operation and is manufactured in different sizes and with several options.
